TitanCloud

Manage Risk. Fuel Profit.

Energy asset performance. Unified.

Titan Cloud is the AI-driven platform for Energy Asset Optimization, connecting people, equipment, and facilities across fuel, site systems, and EV infrastructure. By unifying data from your tanks, dispensers, EV chargers, and sites into a single, secure platform, Titan helps you maximize operational efficiency, reduce risk, and run cleaner, more profitable operations.

See more
Visibility across your global fuel and EV networks.

Act faster
Real-time alerts, workflows, and automation.

Prove value
Data-driven insights for margin, uptime, and compliance.

Operating in **65+** COUNTRIES across
**100,000+** SITES WORLDWIDE

Energy Asset Optimization

Disconnected systems and limited real-time visibility make it hard to protect margins, uptime, and compliance. Titan Cloud connects your energy assets and teams in one platform to turn raw data into clear, prioritized action.

With Titan Cloud, you can:

• **Connect** – Integrate tanks, dispensers, sensors, and EV chargers in one platform.

• **Optimize** – Standardize workflows for supply, maintenance, and compliance.

• **Scale** – Apply best practices across every region, market, and partner.

Our customer success and services teams help you implement quickly and prove ROI across your network.

Our Solutions

Measure, Plan & Supply, Maintain & Optimize, Protect & Comply

FUEL ANALYTICS

Real-time visibility into fuel variance and performance.
- Identify loss from meter drift, theft, leaks, and BOL issues.
- Monitor flow rates and nozzle health to reduce downtime.
- Protect margins with clear, site-level and network-wide insights.

SUPPLY AND LOGISTICS

Inventory, ordering, and dispatch decisions driven by live data.
- Forecast demand and automate orders and dispatch.
- Optimize loads, deliveries, and hauler performance.
- Streamline BOL reconciliation and invoice matching.

MAINTENANCE

End-to-end maintenance management for fuel, non-fuel and EV infrastructure.
- Centralize work orders and asset history for all sites and chargers.
- Prioritize issues using real-time equipment and alarm data.
- Reduce truck rolls and downtime with smarter dispatch and workflows.

ENVIRONMENTAL COMPLIANCE

Automated environmental compliance in a single system of record.
- Centralize release detection, documentation, and reporting.
- Stay ahead of regulations with standardized processes.
- Reduce environmental risk and remediation exposure.

"Titan Cloud solutions have helped tremendously in identifying and resolving inventory variance issues quickly. They've helped detect and mitigate fuel loss chain-wide, efficiently address sources of variance, and manage monthly reconciliation reporting across North America."

Ron Fulencheck, Director, Gasoline Environmental Compliance and Mediation
