

Titan Maintenance

Maximize the value of your fuel and retail assets

Connect every part of your maintenance operation — sites, assets, vendors, and technicians — on one unified platform built for fuel and convenience retailers. Titan Maintenance turns maintenance from a cost center into a driver of uptime and ROI.

Titan Maintenance puts you in control

Manage thousands of sites, dispensers, tanks, and in-store assets from a single platform. Titan Maintenance gives fuel retailers real-time visibility and smart workflows so every job is done on time, on budget, and in compliance.

Trusted by fuel and convenience retailers worldwide

Protect your profits, drive revenue, and keep fuel flowing

Cut maintenance spending

- Reduce truck rolls and vendor overcharges with automated workflows and approvals.
- Enforce contracted rates and catch work that should be covered under warranty.

Complete visibility across every site

- See what's down, who's on-site, and what it's costing across all regions.
- Track asset health and lifecycle cost to decide when to repair, replace, or retire.

Boost asset uptime

- Spot issues early, auto-dispatch vendors, and track downtime for critical fuel and store assets.
- Get dispensers, tanks, POS, back-office systems, and car wash equipment back online fast.

Get EV-ready

- Extend maintenance beyond fuel assets with integrated EV charger maintenance from Titan EV.
- Maximize charger uptime and deliver a reliable charging experience alongside traditional fuel.

Key Features

Automated maintenance management

Respond faster and more consistently to dispenser, tank, and store equipment issues.

- Standardize how sites log issues and manage work orders
- Automate routing, approvals, and vendor dispatch with asset, site, and warranty info

Preventative maintenance management

Reduce unplanned downtime at high-volume fuel sites.

- Schedule inspections and recurring PM for critical fueling/store equipment
- Standardize checklists and refine schedules using performance and cost data

Vendor management

Improve service quality and control third-party costs.

- Set SLAs, response times, and rates by vendor/job type
- Track SLA compliance and compare vendors on cost and performance

Compliance and risk management

Simplify audits and protect your brand at every site.

- Store licenses, permits, and certificates in one digital library
- Verify vendor qualifications and log site incidents (environmental, theft, damage)

Cost control & financial tracking

Keep maintenance spend in check across your network.

- Set budgets and approval limits by site, region, or vendor
- Use workflows and fixed-price contracts; track spend by asset, category, and vendor

Warranty tracking

Stop paying for repairs that should be covered.

- Track warranties at asset and component level
- Auto-flag warranty repairs, route to correct vendor, and report savings

Mobile app for technicians & vendors

Keep maintenance moving in the field – online or offline.

- Update work orders, time, photos, and notes on-site
- Scan assets, view history, and support repair-versus-replace decisions

Real-time reporting & analytics

See network-wide performance at a glance.

- Dashboards for uptime, spend, SLAs, and vendor performance
- Forecast budgets and share reports with operations and finance leaders

Built for multi-site, multi-language operations

Standardize maintenance across distributed fuel networks.

- Manage thousands of assets and sites in one platform
- Support centralized, regional, or franchise models with multi-language support
